### / PROJECTS

#### >> Fund Management

Mobile Application | Complete | Android, Firebase

- > This app was made for smooth processing for the PhD students who need the funds for their research.

#### >> Waste Management

Mobile Application | In Progress 50% Done. | Android, Firebase

- > In the current scenario, the dustbin is filled with garbage but there is no one to clean it. So I want to make an app that can generate automatic alerts to the garbage cleaners when the dustbin is full.

#### >> Covid Aid

Mobile Application | In Progress 45% Done. | Android, Python

- > Based on the current scenario everyone finds it difficult to find oxygen, plasma, etc. This app can have information about the availability of oxygen, plasma, etc and one can request for if not available.

#### >> Deployed ML Model on Azure Cloud

- > Used basic cloud functions to deploy interactive web based prediction.

#### >> Deployed Normal Website Using DevOps

- > Used basic DevOps functionality to deploy a website which have DevOps pipeline.
